

To whom it may concern:

When I bought my XM satellite radio and I immediately noticed how much more I enjoyed listening to it than the regular AM/FM radio. No commercials, hundreds of channels to listen to... it was perfect for someone like me who spends a lot of time in the car. Then my services got even better, because they added traffic and weather channels...the one thing that was missing from it before. Now in the morning I don't have to worry about hurrying to trying to catch the weather on tv because I know if I miss it, I can just catch it in the car. Since I am an XM radio subscriber and pay for these services, please to not take them away or try and change them. My satellite XM is perfect how it is now. Please vote to REJECT NAB's petition 04-160.

Thank You,
Catherine Bryan.
